

> **KAEFER International Training Programme for Engineers - KITE**

Short description	The KITE programme offers KAEFER's trainees the opportunity to gain international project experience and to back it up with sound theoretical knowledge at our Corporate Competence Centre in Bremen. The programme is aimed at young engineers with degrees in mechanical engineering, aeronautics, shipbuilding, construction or industrial engineering with a focus on technical subjects.
Duration	18 months
Programme overview	After several months of preparation in your home country you will take part in two foreign missions of six months each in your local KAEFER region. You will also receive four weeks of training in the Corporate Technology and Research department at group headquarters in Bremen.
Perspectives	The KITE programme not only allows our trainees to gather international experience, but also gives an insight into the processes and structures of the international KAEFER world. You will extend your social and intercultural skills, thereby making you more valuable to KAEFER. Successful and committed trainees are offered interesting positions in a project management environment in order to prepare them for future project leadership tasks. Take this opportunity for an excellent start to your career – we look forward to hearing from you.
