

> **International training for LNG specialists**

Short description	The LNG (liquefied gas) market is booming, and you can be part of it. The KAEFER LNG Trainee Programme is a training programme to prepare you for subsequent work on LNG projects and is aimed at young engineers from all over the world. We have many exciting job opportunities for engineers with specialised knowledge of cryogenic insulation.
Duration	12 months
Programme overview	The KAEFER LNG Programme has three modules, which begin after an initial orientation phase in the home company. 3 months of preparatory training in the Corporate Technology and Research department in Bremen 4 months on-the-job training on an LNG project site abroad 3 months on-the-job training in the <i>Corporate Competence Centre</i> LNG in Bremen
Perspectives	Successful and committed trainees are then offered an interesting position close to the project manager as an introduction to project management.
